

Ahnaf Labib

Project Manager

Plan period

July 6, 2026 - December 31, 2026

Role

Project Manager

Manager

Nick Schramm

Capacity

Project 80% / Product 15% / Internal 5%

DEVELOPMENTAL ROADMAP

Startup, quarterly, and semiannual growth plan

Development roadmap based on Ahnaf's current project manager role, capacity assignment, outcomes, responsibilities, and competency model.

30-DAY STARTUP	July 13, 2026 - August 11, 2026	QUARTERLY PLAN	July 6, 2026 - September 30, 2026
SEMIANNUAL PLAN	July 6, 2026 - December 31, 2026	PRIMARY ROLE BASIS	Project & Product Operations
PRIMARY USE	Developmental clarity and onboarding support		

30-Day Startup Plan

July 13, 2026 - August 11, 2026

Help Ahnaf reconnect to active workstreams, clarify stepped-up ownership expectations, and begin operating as a project/product operations contributor rather than an intern support role.

AREA	FIRST 30-DAY FOCUS	WHAT AHNAF SHOULD DO	EVIDENCE BY DAY 30
Noble	Reconnect to project status and next steps	Review current project materials, identify open items, confirm upcoming milestones, and clarify coordination support with Nick.	Current project summary, open-items list, next-step tracker
MLK	Understand deliverables and communication rhythm	Review project background, meetings, deliverables, and stakeholder needs; begin maintaining notes or status updates.	Project rhythm documented, meeting notes current, deliverables tracker updated
Westfield	Step into higher-capacity coordination	Clarify milestones, active dependencies, and weekly work expectations early because this is the largest project allocation.	Westfield workplan or tracker updated; weekly status view established
Shepherd	Clarify scope and handoff points	Review current scope, identify what needs coordination, and document how the role supports progress.	Scope notes, action-item list, handoff or coordination notes
WINS / SMARTWork	Reconnect to product logic and active workflows	Review product materials, current workflow assumptions, implementation questions, and where project support is needed.	Product notes, workflow questions, implementation support list
WFInsights / GWC	Understand product and data context	Review current product status, data/dashboard needs, and implementation or support tasks.	Product/data context summary, next-step notes
Data & IT Work Group	Re-enter internal systems support	Confirm current Data & IT priorities, tools, recurring needs, and where technical or project coordination support is expected.	Workgroup notes, priority list, technical/context questions

Four-Week Startup Flow

WEEK 1: RE-ENTRY AND CONTEXT REFRESH

Regain current-state awareness.

Meet with Nick to confirm expectations and priority order; review assigned project and product materials; identify what changed since the internship; build one consolidated startup tracker.

EVIDENCE BY WEEK END

Assignment tracker; questions list; project/product status notes; confirmed check-in rhythm with Nick

WEEK 2: WORKSTREAM MAPPING

Understand how each assignment moves.

Map project milestones, owners, dependencies, and recurring meetings; clarify what he owns versus supports; begin updating trackers and notes; identify unclear handoffs as questions.

EVIDENCE BY WEEK END

Project-by-project workstream map; updated trackers; product workflow notes

WEEK 3: ACTIVE COORDINATION

Begin operating in the stepped-up role.

Run or support follow-up loops; prepare status updates; own selected documentation or coordination tasks; test where he can independently move work forward.

EVIDENCE BY WEEK END

Weekly status update; meeting notes and action items; updated project trackers; one technical/product question advanced

WEEK 4: ROLE STEP-UP REVIEW

Confirm what he is ready to own going forward.

Review the first month with Nick; identify workstreams he can manage with less prompting; confirm where more context, training, or decision access is needed.

EVIDENCE BY WEEK END

30-day reflection; manager feedback notes; updated capacity or assignment clarity if needed; next 60-day focus areas

Manager Support During Startup

Provide one clear priority order across all assignments.

Give Ahnaf examples of strong project trackers and status notes.

Identify which meetings he should attend, support, or eventually help run.

Give feedback on one tracker or work product each week.

Clarify what ownership means for Westfield versus the smaller allocations.

Ahnaf Reflection Prompts

1. WHAT FEELS FAMILIAR FROM MY INTERNSHIP?

Development plan validation note. |

2. WHAT FEELS DIFFERENT NOW THAT I AM IN A PROJECT MANAGER ROLE?

Add notes, examples, context, or follow-up items.

3. WHICH PROJECT DO I UNDERSTAND BEST RIGHT NOW?

Add notes, examples, context, or follow-up items.

4. WHICH ASSIGNMENT HAS THE MOST UNCLEAR EXPECTATIONS?

Add notes, examples, context, or follow-up items.

5. WHAT CAN I OWN INDEPENDENTLY BY THE END OF 30 DAYS?

Add notes, examples, context, or follow-up items.

6. WHAT SUPPORT DO I NEED FROM NICK TO MOVE FASTER?

Add notes, examples, context, or follow-up items.

Development Focus Areas

Project & Workstream Coordination

Build reliable rhythms for Noble, MLK, Westfield, and Shepherd through trackers, meeting notes, milestones, status updates, and follow-through.

Product Operations

Connect WINS, SMARTWork, WFInsights, and GWC work to usable product notes, workflow maps, implementation questions, and product support outputs.

Automation & Prototype Support

Grow confidence testing lightweight workflows, documenting assumptions, troubleshooting technical issues, and refining prototype concepts.

Dashboard & Data Support

Support workforce intelligence through organized data inputs, validation notes, dashboard files, and clear data-flow assumptions.

Documentation & Handoff

Create records that make scope, status, technical logic, and next steps easy for Nick and other teammates to understand or continue.

Capacity Anchor

Quarterly Plan

July 6, 2026 - September 30, 2026

Use this first-quarter plan to clarify onboarding, work rhythm, documentation habits, and practical evidence of role growth.

DEVELOPMENT GOAL	ROLE CONNECTION	PRACTICAL EVIDENCE
Establish project rhythm across assigned projects	Noble, MLK, Westfield, Shepherd	Project trackers, recurring updates, meeting notes, next-step lists
Build working knowledge of product workflows	WINS, SMARTWork, WFInsights / GWC	Product notes, workflow maps, implementation questions
Support data and dashboard readiness	Data & IT Work Group	Validated files, dashboard inputs, data-flow notes
Strengthen technical troubleshooting habits	Automation and prototype support	Issue logs, tested options, documented assumptions
Create clear handoff documentation	Documentation & Handoff competency	Handoff notes, status summaries, process documentation

Quarterly Check-In Prompts

1. WHAT WORKSTREAMS CAN AHNAF EXPLAIN CLEARLY WITHOUT HEAVY MANAGER CONTEXT?

Add notes, examples, context, or follow-up items.

2. WHICH PROJECTS HAVE RELIABLE TRACKING, MILESTONES, AND NEXT STEPS?

Add notes, examples, context, or follow-up items.

3. WHERE IS HE STILL BLOCKED BY UNCLEAR TOOLS, DATA, DECISIONS, OR TECHNICAL ASSUMPTIONS?

Add notes, examples, context, or follow-up items.

4. WHAT DOCUMENTATION HAS MADE SOMEONE ELSE'S WORK EASIER TO CONTINUE?

Add notes, examples, context, or follow-up items.

5. WHICH ASSIGNMENT SHOULD RECEIVE MORE MANAGER CONTEXT BEFORE THE NEXT QUARTER?

Add notes, examples, context, or follow-up items.

Semiannual Plan

July 6, 2026 - December 31, 2026

These outcomes describe what stronger independence and role clarity should look like by the end of the first semiannual cycle.

SIX-MONTH DEVELOPMENT OUTCOME	WHAT GOOD LOOKS LIKE
Owns repeatable project coordination routines	Ahnaf can maintain trackers, updates, timelines, and follow-ups across multiple workstreams.
Contributes to product operations with less prompting	He can translate product ideas into workflow steps, documentation, and implementation support.
Improves technical implementation confidence	He can test tools, identify issues, document options, and recommend next steps.

SIX-MONTH DEVELOPMENT OUTCOME	WHAT GOOD LOOKS LIKE
Supports dashboard and data workflows reliably	He can help organize inputs, validate files, and explain data-flow assumptions.
Produces reusable documentation	His notes and handoffs help Nick, project teams, or future team members continue the work.

Manager Support Plan

Hold a weekly project priority check-in.

Clarify escalation paths for blocked technical issues.

Provide examples of strong project documentation and status updates.

Give feedback on one work product per week during onboarding.

Review capacity mix and assignment clarity monthly.

MANAGER SUPPORT NOTES

Document context, support commitments, check-in cadence, or manager follow-up.

Employee Reflection

1. WHAT PROJECT OR PRODUCT AREA IS BECOMING CLEAREST?

Add notes, examples, context, or follow-up items.

2. WHERE DO I NEED MORE CONTEXT?

Add notes, examples, context, or follow-up items.

3. WHAT TOOLS OR SYSTEMS DO I NEED MORE PRACTICE WITH?

Add notes, examples, context, or follow-up items.

4. WHAT DOCUMENTATION AM I CREATING THAT OTHERS CAN USE?

Add notes, examples, context, or follow-up items.

5. WHAT WORK AM I READY TO OWN WITH MORE INDEPENDENCE?

Add notes, examples, context, or follow-up items.

Shared Development Notes

SHARED SUMMARY

Capture shared takeaways, next learning priorities, manager commitments, or follow-up items.
