

Jack Dougher

Director of Workforce Strategy & Product Development

PERSON NAME	Jack Dougher
CURRENT SOURCE TITLE	Director of Workforce Development
RECOMMENDED STANDARDIZED TITLE	Director of Workforce Strategy & Product Development
RECOMMENDED ROLE FAMILY	Management Analysts / Project Management Specialists
REPORTS TO	To be validated by BBS leadership
FUNCTION	Workforce Strategy, Product Development, Client Delivery, and Growth Support
PRIMARY USE	Internal role clarity, operating alignment, performance expectations, and role architecture

Observed work profile: Jack's work is blended across product and service development, business development and partnerships, internal operations, client strategy, data/reporting, and deliverable development. Largest observed work categories include Product & Service Development, Business Development & Partnerships, and Internal Operations/HR/Admin.

Role Purpose

Converts complex workforce, role, task, product, and client-development inputs into clear workforce architecture, product architecture, implementation strategy, and client-ready deliverables that support BBS growth, WINS, SmartWORK, Workforce 4D, AI readiness, and broader organizational capacity work.

Role Outcomes

OUTCOME	WHAT SUCCESS LOOKS LIKE	EVIDENCE / SUCCESS MEASURES
Workforce products move from concept to usable tools	Ideas become structured products, service models, pricing logic, implementation roadmaps, and client-facing materials.	Product roadmap milestones, product briefs, and implementation plans are created.
Client workforce data becomes actionable strategy	Client task, role, capacity, budget, and organizational data are converted into clear insights and executive-ready recommendations.	Quality and timeliness of reports, PCA/BIR, capacity analysis, KPI/system design, and role architecture outputs.
Business development is better framed and supported	Leadership has stronger briefs, proposals, meeting prep, sector research, and opportunity narratives.	Qualified BD pipeline influenced and quality of proposal support improved.

OUTCOME	WHAT SUCCESS LOOKS LIKE	EVIDENCE / SUCCESS MEASURES
Internal strategy becomes executable structure	Internal direction is synthesized into plans, decision frameworks, and structured next steps.	Reduced rework and clearer internal alignment.
Workforce architecture strengthens BBS delivery and scale	BBS has clearer role definitions, competency language, workforce models, and implementation tools.	Workforce analysis is converted into implementation actions and stakeholder satisfaction.

Core Responsibilities

RESPONSIBILITY AREA	CORE RESPONSIBILITIES	EXAMPLE WORK PRODUCTS
Workforce Product Development	Lead development and refinement of SmartWORK, WINS, Workforce 4D, human capacity products, pricing/GTM materials, and implementation roadmaps.	Product briefs, service models, pricing logic, roadmap documents
Client Workforce Strategy & Delivery	Translate client task, role, capacity, budget, organizational, and labor-market inputs into practical insights and executive-facing narratives.	Workforce reports, PCA/BIR materials, capacity analysis, role profiles
Business Development & Opportunity Support	Support proposal development, legislative and sector research, opportunity framing, meeting preparation, and relationship strategy.	Proposals, executive briefs, sector research, opportunity maps
Internal Strategy & Operating Alignment	Synthesize internal strategy discussions into structured plans, leadership documents, priorities, and decision frameworks.	Strategy memos, leadership summaries, prioritization tools
Cross-Functional Coordination	Coordinate across project management, product development, analytics, and senior leadership.	Workplans, action trackers, alignment notes
Workforce Intelligence & Standards Alignment	Maintain familiarity with workforce architecture, competency frameworks, labor-market intelligence, AI-enabled work redesign, and O*NET.	Competency models, role clarity tools, task-skill frameworks

Competency Model

COMPETENCY	DEFINITION	OBSERVABLE BEHAVIORS
Strategic Translation	Turns complex workforce and organizational inputs into clear structure, strategy, and next steps.	Builds frameworks, summaries, role profiles, product briefs, executive narratives, and implementation plans.
Product Architecture	Designs and improves workforce products and service models.	Clarifies product purpose, target users, service tiers, workflows, pricing logic, and implementation requirements.
Workforce Analysis	Interprets task, role, capacity, competency, and organizational data.	Converts data and stakeholder context into insights, recommendations, role clarity tools, and capacity narratives.
Business Development Support	Strengthens opportunity development through research, proposals, briefs, and strategic framing.	Creates executive briefs, proposal language, sector scans, meeting prep, and follow-up materials.
Communication & Synthesis	Makes complex information clear, concise, and useful.	Writes client-ready summaries, presentations, reports, emails, and leadership documents.
Execution Discipline	Moves work from idea to usable output while managing priorities.	Tracks next steps, completes deliverables, coordinates across team members, and reduces rework.
Systems Thinking	Understands how roles, products, data, workflows, strategy, and implementation connect.	Clarifies ownership, builds repeatable tools, and improves operating clarity.

Core Skills

- (Workforce analysis)
 (Systems evaluation)
 (Executive synthesis)
 (Product development)
 (Service design)
 (Roadmap development)
- (Proposal writing)
 (Work planning)
 (Power BI interpretation)
 (Role clarity)
 (O*NET-informed role design)

Key Tools, Systems, and Work Products

- (Product briefs)
 (Workforce frameworks)
 (PCA/BIR materials)
 (Capacity models)
 (Power BI outputs)
 (Excel)
- (QuickBooks Time evidence)
 (Client data extracts)
 (Microsoft Office)
 (Teams)
 (Proposal templates)
- (AI-enabled drafting and synthesis tools)

O*NET Benchmark

PRIMARY O*NET ANCHOR

13-1111.00

Management Analysts

HIGH FIT

SECONDARY OCCUPATIONS

4

Project Management Specialists, Business Intelligence Analysts, General and Operations Managers, Training and Development Specialists

STANDARDIZED BASIS

2 High / 3 Medium

Aligned using current responsibilities, competencies, skills, tools, and work products already documented in the role profile.

Hybrid role interpretation: BBS roles may align to more than one O*NET occupation because current-state work can span strategy, delivery, operations, analytics, product support, and external relationship responsibilities.

PRIMARY OCCUPATION

Management Analysts

FIT BASIS

Strong alignment with workforce strategy, organizational analysis, recommendations, role architecture, and implementation planning.

Role Profile Mapping Fields

- Role outcomes
- Core responsibilities
- Competency model
- Core skills
- Tools, systems, and work products

Representative BBS Tasks

- **Workforce Product Development:** Lead development and refinement of SmartWORK, WINS, Workforce 4D, human capacity products, pricing/GTM materials, and implementation roadmaps.
- **Client Workforce Strategy & Delivery:** Translate client task, role, capacity, budget, organizational, and labor-market inputs into practical insights and executive-facing narratives.
- **Business Development & Opportunity Support:** Support proposal development, legislative and sector research, opportunity framing, meeting preparation, and relationship strategy.
- **Internal Strategy & Operating Alignment:** Synthesize internal strategy discussions into structured plans, leadership documents, priorities, and decision frameworks.
- **Cross-Functional Coordination:** Coordinate across project management, product development, analytics, and senior leadership.
- **Workforce Intelligence & Standards Alignment:** Maintain familiarity with workforce architecture, competency frameworks, labor-market intelligence, AI-enabled work redesign, and O*NET.

Skills And Competencies

- **Strategic Translation:** Turns complex workforce and organizational inputs into clear structure, strategy, and next steps.
- **Product Architecture:** Designs and improves workforce products and service models.
- **Workforce Analysis:** Interprets task, role, capacity, competency, and organizational data.
- **Business Development Support:** Strengthens opportunity development through research, proposals, briefs, and strategic framing.
- **Communication & Synthesis:** Makes complex information clear, concise, and useful.
- **Execution Discipline:** Moves work from idea to usable output while managing priorities.
- **Systems Thinking:** Understands how roles, products, data, workflows, strategy, and implementation connect.

Technology / Work Product Anchors

- Product briefs
- Workforce frameworks
- PCA/BIR materials
- Capacity models
- Power BI outputs
- Excel
- QuickBooks Time evidence
- Client data extracts
- Microsoft Office
- Teams
- Proposal templates
- AI-enabled drafting and synthesis tools

Role Design Note

This role is currently blended across product development, business development, internal strategy, and client delivery. The note is preserved as current-state context only.
